

TEXTURED & FLECKED - CLOSEOUT STOCK

Dyed **Unryu**, “cloud-dragon”, papers are translucent with long kōzo fibers embedded. Our high-quality stock includes both **Unryu** (U-series) and **Tashoku Unryu** (T-series), as well as **Unryu Confetti** (CON). These 3 series are suited not only for all kinds of collage or bookmaking, but make an ideal lampshade paper.

We also have a less-textured, more opaque **Unryu** in subtle pastel colors; more appropriate for inkjet or laser printing (KP).

Kasuiri, meaning paper with kōzo bark in it, are great for collage, box and book making as well as other paper crafts (KP- 600s).

Suna refers to the “sand-like metallic flecks” sprinkled on the **Sunako** paper (KP- 545).
