

# LOKTA WITH INCLUSIONS

The base of these papers is natural Lokta fiber. Dried plants and other organic material, all native to the northern Himalayan region of Nepal, are added to each sheet.

In the case of Ferns & Marigolds and Petals, the plant materials are floated on the screen within the slurry so that the plant material becomes part of the sheet. Our Sawdust papers are made by mixing the sawdust in the vat before screening, giving the paper a unique color and texture. Cornmesh paper is a highly textured natural paper and is exclusive to Paper Connection.

All of our Lokta paper is handmade from the inner bark of the daphne plant. Lokta is subject to variances in weight and color from lot to lot, making each sheet unique.

Please note that while we have done our best to accurately represent the colors, there may be variation depending on your monitor.

Size: 22 x 30 inches.

Weight varies from 15g/m<sup>2</sup> to 100g/m<sup>2</sup>, depending on the paper.

NP-L/PLW Natural Lokta with Petals *Lightweight*

NP-L/CM Natural Lokta with Corn Mesh

NP-L/B/M Natural Lokta with Bougainvillea  
& Marigolds
